

Assignment-01

Critically evaluate the different start up schemes introduced by government of India.

The government of India introduced start up schemes intending to catalyse startup culture & build a strong & inclusive ecosystem for innovation and entrepreneurship in India.

1. ATAL INNOVATION MISSION (AIM)

→ In 2016, NITI Aayog launched this Startup India Scheme, AIM. The organisation has established this scheme to foster innovation by creating new programmes & policies to support development in several economic areas. This government startup scheme provides a forum for co-operation of many players in the entrepreneurial sector.

→ Under this startup scheme, AIM grants approx ₹10 crore financing to the chosen firms over five years. Emerging organisations in health, agriculture, transportation, education etc. can apply for this scheme.

2. DIARY PROCESSING AND INFRASTRUCTURE DEVELOPMENT FUND (DIDF)

→ It helps dairy co-operatives to maintain their competitive edge for the long term benefit of farmers.

→ The government announced the creation of dairy processing and infrastructure development fund with a total system expenditure of ₹11,181 crore.

→ Milk-producing businesses, multi-state milk cooperatives, state dairy federations, NODB subsidiaries and so on are eligible for this scheme.

3. MULTI GRANTS SCHEME (MGS)

→ The multiplier grants scheme (MGS), developed by the department of Electronics & Information Technology, encourages research & development (R&D) partnerships between academics or institutions & the tech industry.

→ The goal for this scheme is to promote and stimulate the development of indigenous products & services.

→ Under this scheme, the government may give up to ₹2 crore financing to each project and each project's term is expected to be less than two years. The cost for industrial organisations will be ₹4 crore over three years.

4. ATMANIRBHAR BHARAT App INNOVATION CHALLENGE

→ Introduced in July 2020, this government startup scheme encouraged Indian startups to collaborate & create solutions made in India for the benefit of those in the country and worldwide.

→ It also urged tech and startup firms to produce cutting-edge mobile applications for a big cash prize.

→ Apps like Bhungar (Jishu equivalent), YourQuote (a writing app), and Koo (Twitter equivalent) were crowned first (₹ 20 lakhs), second (₹ 15 lakhs) & third (₹ 10 lakhs) respectively.

5. SOFTWARE TECHNOLOGY PARK (STP)

→ The software technology park (STP) is a system that is 100% export oriented to increase & export computer software and technical services via physical media or communications infrastructure.

→ Focusing on one business or product, notably computer software, makes the course material distinctive. The initiative of the government's program includes the idea of Export Processing Zones (EPZ) & the suggestion of Science parks or Technology parks, which are currently in use worldwide.

6. STARTUP INDIA INITIATIVE

→ As of June 2021, over 50,000 firms have been recognized via this startup scheme of India, which provides tax benefits to entrepreneurs for a little more than five years. Additionally, it created 5.5 lakhs jobs also.

→ Within this government startup scheme, the maximum age for most eligible startups is now 7 years and for biotechnology companies it is 10 years from the date of establishment.

→ Its numerous benefits make it among the most incredible government-sponsored Startup India Scheme for business owners.

CONCLUSION :

Startup India, a government initiative serves as a vital catalyst for fostering the growth of the Startup culture & the building an inclusive ecosystem for innovation and entrepreneurship in India. With various schemes & financial assistance provided to generate wealth & increase job opportunities within the Indian economy.
